

List of Poster Presenters

P001	Development of bipolar membranes with increased hydrophilicity and catalytic activity by leveraging the physicochemical and structural characteristics of Montmorillonite Mr. Jinhan Park (Jeonbuk National University, South Korea)
P002	Highly Oxidation-resistant Polysulfonate-ester Nanofiltration Membranes for Recycling of Waste Solutions from the Semiconductor Industry Miss Yejin Han (Korea Advanced Institute of Science and Technology, South Korea)
P003	Defect Engineering of MOF-808 Incorporated in Mixed Matrix Membranes for CO ₂ Capture Mr. Po Chun Wu (National Taiwan University, Taiwan)
P005	Porous catalytic bipolar membrane derived from ether-free polymer for the enhancement of water splitting performance and chemical stability Mr. Tai Le (Jeonbuk National University, South Korea)
P006	Advanced Polydopamine-Assisted Immobilization of Lanthanum-EDTA Metalorganic Frameworks onto Polysulfone Membrane for Adsorptive filtration of Lead Mr. Prem Gaudel (Jeonbuk National University, South Korea)
P007	Comparing block and random copolymers for all-polymeric thin film composite membranes for CO ₂ capture : Experimental and computational approach Mr. Jin Hyuk Kim (Yonsei University, South Korea)
P011	Effect of Carbon Quantum Dots Modification on Oil/Water Separation of Cellulose Acetate Tubular Membrane Prof. Hui-An Tsai (Chung Yuan Christian University, Taiwan)
P012	Polyphenol-Assisted Layer-by-Layer Cross-linking of Sulfonated Polyethyleneimine for Highly Selective Pervaporation Dehydration of Butanol Prof. Kueir-Rarn Lee (Chung Yuan Christian University, Taiwan)
P013	Fabrication and application of mono-valent ion selective membranes modified by MXene Mr. Jong-Pil Baek (Sangmyung University, South Korea)
P014	Fabrication and characterization of asymmetric bipolar membranes incorporating MXene catalyst Mr. Eun-Gyu Jang (Sangmyung University, South Korea)
P015	Resource Recovery from Industrial Wastewater via Electrochemical Ion-Exchange Membrane Technology Miss Sinyi Huang (Industrial Technology Research Institute, Taiwan)
P016	Development of CPVC/P(MEA-co-styrene) blend microfiltration membranes using NIPS method Mrs. Urara Tabata (Kogakuin University, Japan)
P017	Zwitterionic Membranes and Biomedical Applications Prof. Yung Chang (Chung Yuan Christian University, Taiwan)
P018	Highly Loaded Prussian Blue Mixed Matrix Membrane for Salt-tolerant Solar Catalytic Oxidation Dr. Li Guiliang (Ningbo Institute of Materials Technology & Engineering, Chinese Academy of Sciences, China)
P019	Diffusion mediated TIPS for preparing PVDF membranes with enhanced separation performances Assoc. Prof. Lin Haibo (Ningbo Institute of Materials Technology & Engineering, Chinese Academy of Sciences, China)
P020	Aluminum MOF 303–PES Composite Ultrafiltration Membranes: A Strategy for Improved Permeability and Antifouling Mr. Mitil Koli (Indian Institute of Technology Bombay, India)
P021	Thin-film composite electro-nanofiltration membrane for one-step and efficient fractionation of dyes and salts in high-salinity textile wastewater Miss Shuangling Xie (Université catholique de Louvain, Belgium)
P022	Catalyst engineering for the multilayer porous graphene synthesis Mr. Park Geon (Pohang University of Science and Technology, South Korea)
P023	Construction of Hydrazide COFs Membranes and Their Application in Rare-Metal Ion Separation Miss Ke Shi (Ningbo Institute of Materials Technology and Engineering, Chinese Academy of Sciences, China)
P024	Microporous Forward Osmosis Membrane with Vertically Aligned 2D Nanosheets for Exceptional Permselectivity Miss Hui Jin (Ningbo Institute of Materials Technology and Engineering, Chinese Academy of Sciences, China)
P025	Loose Polyester Nanofiltration Membrane Designed with Hydroxyl-Ammonium for Efficient Dye/Salt Separation Mrs. Ma Nan (Ningbo Institute of Materials Technology & Engineering, Chinese Academy of Sciences, China)
P026	Tailored Heterogeneity in SPEEK Membranes for Advanced Blue Energy Harvesting Dr. Yumeng Guo (Nanjing Tech University, China)
P027	Synthesis of self-standing fluorine-substituted covalent organic framework membrane via homogeneous solvothermal method Miss Yuxin He (Ningbo Institute of Materials Technology and Engineering, Chinese Academy of Science, China)
P028	Precise pore structure regulation of polyethersulfone (PES) hollow fiber membranes and its application in the purification of biological products and virus filtration Mrs. Qiu Han (Ningbo Institute of Materials Technology & Engineering, Chinese Academy of Sciences, China)
P029	Advanced Magnetic-Responsive Mixed Matrix Membranes (MMMs) for CO ₂ Capture and Gas Separation Mrs. Jana Floreková (University of Chemistry and Technology, Prague)
P030	Development Thin-film nano composite Hollow Fiber Membranes for CO ₂ Separation Using a MOF-COP Composite on Porous Substrate Dr. Ook Choi (Incheon National University, South Korea)
P031	Design and Performance Assessment of a Hemodialysis System Utilizing Ceramic Hollow Fiber Membranes Mr. Jae Yeon Hwang (Dongguk University, South Korea)
P032	Investigation of interaction between organic solvent and high-performance GO/hBN organic solvent nanofiltration membrane Mr. Hobin Jee (Gyeongsang National University, South Korea)

P033	Solvent-free Polyester TFC Membrane Fabrication for Saline Water Recovery Miss. Nadiene Salleha binti Mohd Nawi (Universiti Teknologi Malaysia, Malaysia)
P034	PPO-based ion exchange membranes with distinct functional groups for bioelectrochemical systems: A comparative study of sulfonated and quaternized types in MFC and MEC modes Mrs. Yudam Jung (Gyeongsang National University, South Korea)
P035	MFI zeolite membrane reactor for enhanced and stable para-xylene production from transalkylation of toluene with 1, 2, 4-trimethylbenzene Assoc. Prof. Chun Zhang (Nanjing Tech University, China)
P036	Study on Membrane Separation in the Purification and Separation Process of Radioactive Gases Dr. Ge Chaoqi (CNNC No.7 Research and Design Institute Co. Ltd, China)
P037	Fabrication and Performance Enhancement of Pd-Ru Hollow Fiber Membranes Supported on γ -Al ₂ O ₃ Modified α -Al ₂ O ₃ for High-Temperature Hydrogen Separation Prof. Jung Hoo Park (Dongguk University, South Korea)
P038	Fabrication and Performance Evaluation of P84 Polyimide Hollow Fiber Membranes for Organic Solvent Nanofiltration Mr. Youngho Cho (Pukyong National University, South Korea)
P039	Theoretical Evaluation of Li Ion Conductivity in Single Ion Conductive Polymers Mr. Naoki Akaïke (Kogakuin University, Japan)
P040	Black TiO ₂ -Coated Hollow Fiber Membranes for Efficient Photocatalytic Removal of Ammonia Gas Mr. Xuelong Zhuang (Dongguk University, South Korea)
P041	Optimization of NiHCF-based Mixed Matrix Membranes for CO ₂ separation : Structural, Adsorption, and Feature importance analysis via machine learning Mr. Dohyoung Kang (Gyeongsang National University, South Korea)
P043	Interface Reconstruction of Polyamide Nanolayers enabled by Bidentate Ammonium Modification for Precise Li ⁺ /Mg ²⁺ Separation Mr. Shuzhen Zhao (Kobe University, Japan)
P044	Self-standing covalent organic framework membranes as a protective layer for membrane distillation Dr. Chang Xiaoping (Kobe University, Japan)
P045	Facile Strategy to Improve Li ⁺ /Mg ²⁺ Selectivity in Nanofiltration Membranes via Amine-Polymer Additive Engineering Dr. Shaofan Duan (Kobe University, Japan)
P046	Evaluation of CO ₂ separation property of a module with facilitated transport hollow fiber membranes Mr. Koki Ohashi (Kobe University, Japan)
P047	Polyethylenimine-based polyamide membranes for efficient organic solvent reverse osmosis Mr. Aiwen Zhang (Kobe University, Japan)
P048	Re-entrant structural design on hydrophobic membranes to enhance anti-wetting performance in membrane distillation Mr. Bowen Li (Kobe University, Japan)
P049	Forward osmosis process for organic/SO ₄ ²⁻ selective concentration in sewage Mr. Haruto Morishita (Kobe University, Japan)
P050	Effect of the support of silicalite-1 membrane on ethanol/water separation performance Miss Mari Nagao (Waseda University, Japan)
P051	Solar Driven MXene/MoS ₂ Photothermal Membrane Distillation for Seawater Desalination Miss. Nurul Syazana Binti Fuzil (Universiti Teknologi MARA, Malaysia)
P052	Molecular Dynamics Study on The Transport Mechanisms of Organic Solvent Mixtures in Ceramic Nanopores Mr. Takeru Suzuki (Kobe University, Japan)
P053	Gas Permeation Characteristics and Hydrothermal Stability of Microporous TiO ₂ -Al ₂ O ₃ -Double Chelating Ligand (Bi-OCL) Composite Membranes for Hydrogen Separation Mr. Kota Nakano (Kobe University, Japan)
P054	Modeling of Rejection of Neutral Organic Compound in RO Mr. Hibiki Sakurai (Kogakuin University, Japan)
P055	Fabrication of ZnCoFe LDH incorporated PES hollow fiber ultrafiltration membrane for the separation of agrochemicals and textile dyes from wastewater Miss Haritha P (National Institute of Technology Karnataka, Surathkal, India)
P057	Interfacial Polymerized Covalent Organic Frameworks-Polyamide Composite Membranes for Pervaporation Dehydration of Biobutanol Prof. Shu-Hsien Huang (National Ilan University, Taiwan)
P058	A Membrane-Based Immunosensor Enabling High Antifouling Properties and Sensitive Molecular Recognition Mr. Hiroki Yamashita (Institute of Science Tokyo, Japan)
P059	Permselective Performance of CHA Membranes for Vapor Separation Mr. Ko Kawanishi (Waseda University, Japan)
P060	Molecular Simulations for Investigating Gas Adsorption and Diffusion in Metal-Organic Frameworks Mr. Zheng-Xuan Wu (National Taiwan University, Taiwan)
P061	Advances of Inorganic Membranes in Industrial Wastewater Treatment Miss. Longjam Chanu (IIT Roorkee, India)
P062	Development of Fluorine-Free Anionic Polymer Electrolyte Membranes Using Aromatic Hydrocarbon Polymers By Radiation-Induced Graft Polymerization and Their Alkaline Resistance Dr. Shin Hasegawa (National Institutes for Quantum and Radiological Science and Technology, Japan)
P063	Bipolar Membranes Incorporating A Three-Dimensional Junction and ZSM-5 To Enhance Structural Stability and Water-Splitting Efficiency Mr. Wooseop Yun (Jeonbuk University, South Korea)

P064	Methods for Fouling Mitigation in Membrane Distillation Miss Proneeta Uttam (Indian Institute of Technology Roorkee, India)
P065	Interfacial Polymerization of MPN/MOF-801-P Composite Polyamide Membranes on PES Flat Sheets for Water Treatment Mr. Jinwon Seo (Pukyong National University, South Korea)
P066	Polyacrylonitrile Hollow Fiber Membranes: Synthesis Parameter Optimization for Post-Combustion CO ₂ Separation from Flue Gas Dr.Akshay Modi (Indian Institute of Science Education and Research Bhopal, India)
P067	Zero-Sintering Geopolymer Membranes from Palm Oil Fuel Ash: A Green Solution for Industrial Wastewater Treatment Miss. Nurul Hazirah Rosli (Universiti Teknologi Malaysia, Malaysia)
P068	Protein-incorporated Filtration Membrane for Urea Removal in Portable Peritoneal Dialysis Applications Dr. Mei Qun Seah (Chalmers University of Technology, Sweden)
P069	Dynamic Covalent Chemistry Enabled Closed-loop Recycling of Thermally Modified Polymer Membrane Mr. Ching Yoong Loh (University of Bath, United Kingdom)
P070	Terahertz Conductivity of Free-Standing 3D Covalent Organic Framework Membranes Fabricated via Triple-Layer-Dual Interfacial Approach Mr. Adithyan Puthukkudi (National Institute of Science Education and Research, Bhubaneswar, Odisha, India)
P071	Mathematical modelling of CO ₂ /CH ₄ separation through high-permeable hollow fiber DD3R zeolite membranes Mr. Xiang Jin (Nanjing Tech University, China)
P072	Cobalt oxide nanoparticle-decorated 2D Mxene for efficient persulfate activation Prof. Eunju Kim (Seoul National University of Science and Technology, South Korea)
P073	Engineering and Scale-Up of Pervaporation Membrane with an Intermediate Layer Assoc. Prof. Jie Li (Beijing University of Technology, China)
P074	Chelation-Driven In-Situ Growth of Uniform Palladium Nanoparticles in Polythiosemicarbazide Membranes for Catalytic Water Treatment Dr. Jamaliah Aburabie (New York University Abu Dhabi, United Arab Emirates)
P075	Binary-halogen doped BSCF oxide provides a highly oxygen permeable membrane Mr. Yongfan Zhu (Nanjing Tech University, China)
P076	Remote Operation and Field Demonstration of a Pilot-Scale MCDI System in Malaysia Dr. Changseog Oh (Korea Institute of Civil Engineering and Building Technology (KICT), South Korea)
P077	Construction of bionic enzyme gas channels on the surface of PMP hollow fiber membrane for rapid CO ₂ removal in ECCO2R system Miss Xiaoyun Wang (Nanjing Tech University, China)
P078	The Dual Effects of the Integrated Heat Exchange Membrane Distillation Module: Near-Surface Heating, & Turbulence Promoting Miss Fangli Zhang (Nanjing Tech University, China)
P079	An Atomistical Investigation of CO ₂ /CH ₄ Adsorption by Matrimid/ZIF-8 based Mixed Matrix Membranes through Molecular Simulation Mr. Jia Cheng Loh (Universiti Teknologi PETRONAS, Malaysia)
P080	Preparation and Mass Transfer Mechanism Study of Polyvinylidene Fluoride Piezoelectric Membrane Mr. Qiuyueming Zhou (Nanjing Tech University, China)
P081	High-Performance Polyamide Nanofiltration Membrane via MXene Confined Regulation for Lithium Extraction from Salt-Lake Brines Mr.Qiuyueming Zhou (Nanjing Tech University, China)
P082	Development of ZIF-8/Biopolymer Hybrid Membranes for Selective Removal of Heavy Metals from Aqueous Solutions Mrs. Didem AYDIN (Selcuk University, Türkiye)
P083	Fabrication of High Permeance Hollow Fiber Nanofiltration Membrane with Enhanced Organic Micropollutant Rejection for Drinking Water Treatment Miss. Shuaiyu Chen (The University of Hong Kong, Hong Kong)
P084	Fabrication of PSS-MOF-303/rGO Membranes for Effective Separation of Rare Metal Ions Mr. Chuang Li (Kobe university, Japan)
P085	Design of Nanostructured Porous Membranes via Block Copolymer Self-Assembly for Advanced Separation Applications Prof. Mustafa Ozmen (Selcuk University, Türkiye)
P086	Compressed Air Backwash for Increased Recovery Rate and Enhanced Fouling Control Mr. Sanghak Lee (Kyungpook National University, South Korea)
P087	Flow-Electrode Capacitive Deionization for Phosphorus Removal From Secondary Wastewater Effluent Miss Hyewon Kim (Kyungpook National University, South Korea)
P088	Enhancing Conductivity and Alkaline Stability of Poly(Aryl Piperidinium) Anion Exchange Membrane for Fuel Cells by Grafting Side-chain Type Piperidinium Dr. Wei Yuan (Chongqing University, China)
P089	Enhanced CO ₂ Separation Using CNT-Reinforced Cellulose Triacetate Membranes with High Ionic Liquid Loading Mrs. Jana Floreková (University of Chemistry and Technology, Prague)
P091	Janus PAN-PCA-PTFE Membrane with Bidirectional Selectivity for Enhanced Oil/Water Emulsion Separation Miss Liu yi (Central South University, China)
P092	Impact of Trace Light Hydrocarbons in CO ₂ /CH ₄ Mixtures through Zeolite Membrane Mr. Hayato Chiba (Kogakuin University, Japan)
P095	Effect of Main Chain Structure on Gas Transport Properties of Thermally Rearranged Polybenzoxazole Copolymers Mr. Wataru Sakanishi (Kyoto Institute of Technology, Japan)
